## Opis produktu

Debut studio album
Storming out from Finland Saitma deliver their uncompromising view on the darkest side of metal. Okta(meaning ‘one’) spawned in the depths of snow bunker creating itself without permission from the mortal. It is the incarnation of invocation that needed no talking nor planning. Some of the the material that can be heard on Okta have their seeds as far as in the late 90’s yet the majority have their history in this day. Oktais in the timeless zone which knows no secularity, no geography, no borders,
no dogmas but its own.

Musically one can expect black metal that might carry notable shapes from early black metal with wide range crashing elements from doom psalms to rabies-ridden battle chants.

No clean singing, no synths. Ever.
